Website evaluation

Remember, there's lots of information out there on the web-- some of it true and some of it not. Your job as a researcher is to discern which information is credible, reputable and valuable for your project. Don't believe everything you read or hear! Be a savvy researcher! If you can answer YES! to all of the following checklist items, you probably have a reputable website to use.

Web address: _____

	Yes!	No...
Are the author's first and last names listed?		
Does the information on this page match other information you have found so far?		
Does the author include a complete bibliography of where he/she found the information?		
Does this website include links to other reputable websites and sources of information?		
Do all of the links work?		
Is the copyright date within the last 3-4 years?		
Is the information up-to-date?		
Are the words on the page spelled correctly and clearly proofread?		
Is the website sponsored by a reputable company or organization? (especially <.edu>, <.org>, <.gov>)		
Is the website free of sales pitches and offers for you to purchase something?		
Other?
